

# CVE-1999-0248

[MITRE](#)[NVD](#)[CVE.ORG](#)[JSON API](#)[Print: PDF](#)

## Summary

|                        |                                                                                                                              |
|------------------------|------------------------------------------------------------------------------------------------------------------------------|
| <b>CVE</b>             | CVE-1999-0248                                                                                                                |
| <b>State</b>           | PUBLIC                                                                                                                       |
| <b>Assigner</b>        | cve@mitre.org                                                                                                                |
| <b>Source Priority</b> | CVE Program / NVD first with legacy fallback                                                                                 |
| <b>Published</b>       | 1999-01-01 05:00:00 UTC                                                                                                      |
| <b>Updated</b>         | 2008-09-05 20:16:00 UTC                                                                                                      |
| <b>Description</b>     | A race condition in the authentication agent mechanism of sshd 1.2.17 allows an attacker to steal another user's credentials |

## Risk And Classification

**Problem Types:** NVD-CWE-Other

## NVD Known Affected Configurations (CPE 2.3)

| Type        | Vendor              | Product             | Version | Update | Edition | Language |
|-------------|---------------------|---------------------|---------|--------|---------|----------|
| Application | <a href="#">Ssh</a> | <a href="#">Ssh</a> | 1.2.27  | All    | All     | All      |
| Application | <a href="#">Ssh</a> | <a href="#">Ssh</a> | 1.2.27  | All    | All     | All      |
