

# CVE-1999-0566

[MITRE](#)[NVD](#)[CVE.ORG](#)[Print: PDF](#) 

## Summary

|                        |                                                                                                                                     |
|------------------------|-------------------------------------------------------------------------------------------------------------------------------------|
| <b>CVE</b>             | CVE-1999-0566                                                                                                                       |
| <b>State</b>           | PUBLIC                                                                                                                              |
| <b>Assigner</b>        | cve@mitre.org                                                                                                                       |
| <b>Source Priority</b> | CVE Program / NVD first with legacy fallback                                                                                        |
| <b>Published</b>       | 1997-08-01 04:00:00 UTC                                                                                                             |
| <b>Updated</b>         | 2022-08-17 08:15:00 UTC                                                                                                             |
| <b>Description</b>     | An attacker can write to syslog files from any location, causing a denial of service by filling up the logs, and hiding activities. |

## Risk And Classification

**Problem Types:** NVD-CWE-Other

## NVD Known Affected Configurations (CPE 2.3)

| Type             | Vendor              | Product             | Version | Update | Edition | Language |
|------------------|---------------------|---------------------|---------|--------|---------|----------|
| Operating System | <a href="#">ibm</a> | <a href="#">Aix</a> | All     | All    | All     | All      |
| Operating System | <a href="#">ibm</a> | <a href="#">Aix</a> | All     | All    | All     | All      |
