

# CVE-2000-0008

[MITRE](#)[NVD](#)[CVE.ORG](#)[JSON API](#)[Print: PDF](#)

## Summary

|                        |                                                                                         |
|------------------------|-----------------------------------------------------------------------------------------|
| <b>CVE</b>             | CVE-2000-0008                                                                           |
| <b>State</b>           | PUBLIC                                                                                  |
| <b>Assigner</b>        | cve@mitre.org                                                                           |
| <b>Source Priority</b> | CVE Program / NVD first with legacy fallback                                            |
| <b>Published</b>       | 1999-12-26 05:00:00 UTC                                                                 |
| <b>Updated</b>         | 2022-08-17 10:15:00 UTC                                                                 |
| <b>Description</b>     | FTPPro allows local users to read sensitive information, which is stored in plain text. |

## Risk And Classification

**Problem Types:** NVD-CWE-Other

## NVD Known Affected Configurations (CPE 2.3)

| Type        | Vendor                              | Product                | Version | Update | Edition | Language |
|-------------|-------------------------------------|------------------------|---------|--------|---------|----------|
| Application | <a href="#">1st Choice Software</a> | <a href="#">Ftppro</a> | 7.5     | All    | All     | All      |
| Application | <a href="#">1st Choice Software</a> | <a href="#">Ftppro</a> | 7.5     | All    | All     | All      |
