

# CVE-2000-0371

[MITRE](#)[NVD](#)[CVE.ORG](#)[JSON API](#)[Print: PDF](#)

## Summary

|                        |                                                                                                                        |
|------------------------|------------------------------------------------------------------------------------------------------------------------|
| <b>CVE</b>             | CVE-2000-0371                                                                                                          |
| <b>State</b>           | PUBLIC                                                                                                                 |
| <b>Assigner</b>        | cve@mitre.org                                                                                                          |
| <b>Source Priority</b> | CVE Program / NVD first with legacy fallback                                                                           |
| <b>Published</b>       | 1999-03-01 05:00:00 UTC                                                                                                |
| <b>Updated</b>         | 2008-09-10 19:04:00 UTC                                                                                                |
| <b>Description</b>     | The libmediatool library used for the KDE mediatool allows local users to create arbitrary files via a symlink attack. |

## Risk And Classification

**Problem Types:** NVD-CWE-Other

## NVD Known Affected Configurations (CPE 2.3)

| Type             | Vendor              | Product             | Version | Update | Edition | Language |
|------------------|---------------------|---------------------|---------|--------|---------|----------|
| Operating System | <a href="#">Kde</a> | <a href="#">Kde</a> | 1.1     | All    | All     | All      |
| Operating System | <a href="#">Kde</a> | <a href="#">Kde</a> | 1.1.1   | All    | All     | All      |
| Operating System | <a href="#">Kde</a> | <a href="#">Kde</a> | 1.1     | All    | All     | All      |
| Operating System | <a href="#">Kde</a> | <a href="#">Kde</a> | 1.1.1   | All    | All     | All      |
