

# CVE-2001-0388

[MITRE](#)[NVD](#)[CVE.ORG](#)[JSON API](#)[Print: PDF](#)

## Summary

|                        |                                                                                                      |
|------------------------|------------------------------------------------------------------------------------------------------|
| <b>CVE</b>             | CVE-2001-0388                                                                                        |
| <b>State</b>           | PUBLIC                                                                                               |
| <b>Assigner</b>        | cve@mitre.org                                                                                        |
| <b>Source Priority</b> | CVE Program / NVD first with legacy fallback                                                         |
| <b>Published</b>       | 2001-06-27 04:00:00 UTC                                                                              |
| <b>Updated</b>         | 2017-10-10 01:29:00 UTC                                                                              |
| <b>Description</b>     | time server daemon timed allows remote attackers to cause a denial of service via malformed packets. |

## Risk And Classification

**Problem Types:** NVD-CWE-Other

## NVD Known Affected Configurations (CPE 2.3)

| Type             | Vendor                       | Product                        | Version | Update | Edition | Language |
|------------------|------------------------------|--------------------------------|---------|--------|---------|----------|
