

# CVE-2001-1101

[MITRE](#)[NVD](#)[CVE.ORG](#)[JSON API](#)[Print: PDF](#)

## Summary

|                        |                                                                                                                                                                                                                                                      |
|------------------------|------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|
| <b>CVE</b>             | CVE-2001-1101                                                                                                                                                                                                                                        |
| <b>State</b>           | PUBLIC                                                                                                                                                                                                                                               |
| <b>Assigner</b>        | cve@mitre.org                                                                                                                                                                                                                                        |
| <b>Source Priority</b> | CVE Program / NVD first with legacy fallback                                                                                                                                                                                                         |
| <b>Published</b>       | 2001-09-08 04:00:00 UTC                                                                                                                                                                                                                              |
| <b>Updated</b>         | 2017-12-19 02:29:00 UTC                                                                                                                                                                                                                              |
| <b>Description</b>     | The Log Viewer function in the Check Point FireWall-1 GUI for Solaris 3.0b through 4.1 SP2 does not check for the existence of the file specified in the log file name. This could allow an attacker to execute arbitrary code on the target system. |

## Risk And Classification

**Problem Types:** NVD-CWE-Other

## NVD Known Affected Configurations (CPE 2.3)

| Type        | Vendor                     | Product                    | Version | Update | Edition | Language |
|-------------|----------------------------|----------------------------|---------|--------|---------|----------|
| Application | <a href="#">Checkpoint</a> | <a href="#">Firewall-1</a> | 3.0     | All    | All     | All      |
| Application | <a href="#">Checkpoint</a> | <a href="#">Firewall-1</a> | 4.0     | All    | All     | All      |
| Application | <a href="#">Checkpoint</a> | <a href="#">Firewall-1</a> | 4.1     | All    | All     | All      |
| Application | <a href="#">Checkpoint</a> | <a href="#">Firewall-1</a> | 4.1     | sp1    | All     | All      |
| Application | <a href="#">Checkpoint</a> | <a href="#">Firewall-1</a> | 4.1     | sp2    | All     | All      |
| Application | <a href="#">Checkpoint</a> | <a href="#">Firewall-1</a> | 3.0     | All    | All     | All      |
| Application | <a href="#">Checkpoint</a> | <a href="#">Firewall-1</a> | 4.0     | All    | All     | All      |
| Application | <a href="#">Checkpoint</a> | <a href="#">Firewall-1</a> | 4.1     | All    | All     | All      |
| Application | <a href="#">Checkpoint</a> | <a href="#">Firewall-1</a> | 4.1     | sp1    | All     | All      |
| Application | <a href="#">Checkpoint</a> | <a href="#">Firewall-1</a> | 4.1     | sp2    | All     | All      |
