

# CVE-2001-1209

[MITRE](#)[NVD](#)[CVE.ORG](#)[JSON API](#)[Print: PDF](#)

## Summary

|                        |                                                                                                                                      |
|------------------------|--------------------------------------------------------------------------------------------------------------------------------------|
| <b>CVE</b>             | CVE-2001-1209                                                                                                                        |
| <b>State</b>           | PUBLIC                                                                                                                               |
| <b>Assigner</b>        | cve@mitre.org                                                                                                                        |
| <b>Source Priority</b> | CVE Program / NVD first with legacy fallback                                                                                         |
| <b>Published</b>       | 2001-12-31 05:00:00 UTC                                                                                                              |
| <b>Updated</b>         | 2009-04-30 04:08:00 UTC                                                                                                              |
| <b>Description</b>     | Directory traversal vulnerability in zml.cgi allows remote attackers to read arbitrary files via a .. (dot dot) in the file paramete |

## Risk And Classification

**Problem Types:** NVD-CWE-Other

## NVD Known Affected Configurations (CPE 2.3)

| Type        | Vendor                        | Product                 | Version | Update | Edition | Language |
|-------------|-------------------------------|-------------------------|---------|--------|---------|----------|
| Application | <a href="#">Abe Timmerman</a> | <a href="#">Zml.cgi</a> | 0.0     | All    | All     | All      |
| Application | <a href="#">Abe Timmerman</a> | <a href="#">Zml.cgi</a> | 0.0     | All    | All     | All      |
