

# CVE-2002-0011

[MITRE](#)[NVD](#)[CVE.ORG](#)[JSON API](#)[Print: PDF](#)

## Summary

|                        |                                                                                                                                        |
|------------------------|----------------------------------------------------------------------------------------------------------------------------------------|
| <b>CVE</b>             | CVE-2002-0011                                                                                                                          |
| <b>State</b>           | PUBLIC                                                                                                                                 |
| <b>Assigner</b>        | cve@mitre.org                                                                                                                          |
| <b>Source Priority</b> | CVE Program / NVD first with legacy fallback                                                                                           |
| <b>Published</b>       | 2002-01-31 05:00:00 UTC                                                                                                                |
| <b>Updated</b>         | 2008-09-10 19:11:00 UTC                                                                                                                |
| <b>Description</b>     | Information leak in doeditvotes.cgi in Bugzilla before 2.14.1 may allow remote attackers to more easily conduct attacks on the system. |

## Risk And Classification

**Problem Types:** NVD-CWE-Other

## NVD Known Affected Configurations (CPE 2.3)

| Type        | Vendor  | Product  | Version | Update | Edition | Language |
|-------------|---------|----------|---------|--------|---------|----------|
| Application | Mozilla | Bugzilla | All     | All    | All     | All      |

## References
