

# CVE-2003-0609

[MITRE](#)[NVD](#)[CVE.ORG](#)[JSON API](#)[Print: PDF](#)

## Summary

|                        |                                                                                                                                 |
|------------------------|---------------------------------------------------------------------------------------------------------------------------------|
| <b>CVE</b>             | CVE-2003-0609                                                                                                                   |
| <b>State</b>           | PUBLIC                                                                                                                          |
| <b>Assigner</b>        | cve@mitre.org                                                                                                                   |
| <b>Source Priority</b> | CVE Program / NVD first with legacy fallback                                                                                    |
| <b>Published</b>       | 2003-08-27 04:00:00 UTC                                                                                                         |
| <b>Updated</b>         | 2018-10-30 16:26:00 UTC                                                                                                         |
| <b>Description</b>     | Stack-based buffer overflow in the runtime linker, ld.so.1, on Solaris 2.6 through 9 allows local users to gain root privileges |

## Risk And Classification

**Problem Types:** NVD-CWE-Other

## NVD Known Affected Configurations (CPE 2.3)

| Type             | Vendor              | Product                 | Version | Update | Edition | Language |
|------------------|---------------------|-------------------------|---------|--------|---------|----------|
| Operating System | <a href="#">Sun</a> | <a href="#">Solaris</a> | 2.6     | All    | All     | All      |
| Operating System | <a href="#">Sun</a> | <a href="#">Solaris</a> | 7.0     | All    | x86     | All      |
