

# CVE-2003-1024

[MITRE](#)[NVD](#)[CVE.ORG](#)[JSON API](#)[Print: PDF](#)

## Summary

|                        |                                                                                                                                    |
|------------------------|------------------------------------------------------------------------------------------------------------------------------------|
| <b>CVE</b>             | CVE-2003-1024                                                                                                                      |
| <b>State</b>           | PUBLIC                                                                                                                             |
| <b>Assigner</b>        | cve@mitre.org                                                                                                                      |
| <b>Source Priority</b> | CVE Program / NVD first with legacy fallback                                                                                       |
| <b>Published</b>       | 2004-01-20 05:00:00 UTC                                                                                                            |
| <b>Updated</b>         | 2018-10-30 16:25:00 UTC                                                                                                            |
| <b>Description</b>     | Unknown vulnerability in the ls-F builtin function in tcsh on Solaris 8 allows local users to create or delete files as other user |

## Risk And Classification

**Problem Types:** NVD-CWE-Other

## NVD Known Affected Configurations (CPE 2.3)

| Type             | Vendor              | Product               | Version | Update | Edition | Language |
|------------------|---------------------|-----------------------|---------|--------|---------|----------|
| Operating System | <a href="#">Sun</a> | <a href="#">Sunos</a> | 5.8     | All    | All     | All      |
| Operating System | <a href="#">Sun</a> | <a href="#">Sunos</a> | 5.8     | All    | All     | All      |
