

# CVE-2004-0345

[MITRE](#)[NVD](#)[CVE.ORG](#)[JSON API](#)[Print: PDF](#)

## Summary

|                        |                                                                                                                              |
|------------------------|------------------------------------------------------------------------------------------------------------------------------|
| <b>CVE</b>             | CVE-2004-0345                                                                                                                |
| <b>State</b>           | PUBLIC                                                                                                                       |
| <b>Assigner</b>        | cve@mitre.org                                                                                                                |
| <b>Source Priority</b> | CVE Program / NVD first with legacy fallback                                                                                 |
| <b>Published</b>       | 2004-11-23 05:00:00 UTC                                                                                                      |
| <b>Updated</b>         | 2017-07-11 01:30:00 UTC                                                                                                      |
| <b>Description</b>     | Buffer overflow in Red Faction client 1.20 and earlier allows remote servers to execute arbitrary code via a long server nam |

## Risk And Classification

**Problem Types:** NVD-CWE-Other

## NVD Known Affected Configurations (CPE 2.3)

| Type        | Vendor                   | Product                     | Version | Update | Edition | Language |
|-------------|--------------------------|-----------------------------|---------|--------|---------|----------|
| Application | <a href="#">Volition</a> | <a href="#">Red Faction</a> | 1.0     | All    | All     | All      |
| Application | <a href="#">Volition</a> | <a href="#">Red Faction</a> | 1.1     | All    | All     | All      |
| Application | <a href="#">Volition</a> | <a href="#">Red Faction</a> | 1.20    | All    | All     | All      |
| Application | <a href="#">Volition</a> | <a href="#">Red Faction</a> | 1.0     | All    | All     | All      |
| Application | <a href="#">Volition</a> | <a href="#">Red Faction</a> | 1.1     | All    | All     | All      |
| Application | <a href="#">Volition</a> | <a href="#">Red Faction</a> | 1.20    | All    | All     | All      |
