

# CVE-2004-1390

[MITRE](#)[NVD](#)[CVE.ORG](#)[JSON API](#)[Print: PDF](#)

## Summary

|                        |                                                                                                                        |
|------------------------|------------------------------------------------------------------------------------------------------------------------|
| <b>CVE</b>             | CVE-2004-1390                                                                                                          |
| <b>State</b>           | PUBLIC                                                                                                                 |
| <b>Assigner</b>        | cve@mitre.org                                                                                                          |
| <b>Source Priority</b> | CVE Program / NVD first with legacy fallback                                                                           |
| <b>Published</b>       | 2004-12-31 05:00:00 UTC                                                                                                |
| <b>Updated</b>         | 2017-07-11 01:30:00 UTC                                                                                                |
| <b>Description</b>     | Multiple buffer overflows in the PPPoE daemon (PPPoEd) in QNX RTP 6.1 allow remote attackers to execute arbitrary code |

## Risk And Classification

**Problem Types:** NVD-CWE-Other

## NVD Known Affected Configurations (CPE 2.3)

| Type        | Vendor              | Product              | Version | Update | Edition | Language |
|-------------|---------------------|----------------------|---------|--------|---------|----------|
| Application | <a href="#">Qnx</a> | <a href="#">Rtos</a> | 2.4     | All    | All     | All      |
| Application | <a href="#">Qnx</a> | <a href="#">Rtos</a> | 4.25    | All    | All     | All      |
| Application | <a href="#">Qnx</a> | <a href="#">Rtos</a> | 6.1.0   | All    | All     | All      |
| Application | <a href="#">Qnx</a> | <a href="#">Rtos</a> | 6.2.0   | All    | All     | All      |
| Application | <a href="#">Qnx</a> | <a href="#">Rtos</a> | 6.2.0a  | All    | All     | All      |
| Application | <a href="#">Qnx</a> | <a href="#">Rtos</a> | 2.4     | All    | All     | All      |
| Application | <a href="#">Qnx</a> | <a href="#">Rtos</a> | 4.25    | All    | All     | All      |
| Application | <a href="#">Qnx</a> | <a href="#">Rtos</a> | 6.1.0   | All    | All     | All      |
