

# CVE-2005-1227

[MITRE](#)[NVD](#)[CVE.ORG](#)[JSON API](#)[Print: PDF](#)

## Summary

|                        |                                                                                                                                    |
|------------------------|------------------------------------------------------------------------------------------------------------------------------------|
| <b>CVE</b>             | CVE-2005-1227                                                                                                                      |
| <b>State</b>           | PUBLIC                                                                                                                             |
| <b>Assigner</b>        | cve@mitre.org                                                                                                                      |
| <b>Source Priority</b> | CVE Program / NVD first with legacy fallback                                                                                       |
| <b>Published</b>       | 2005-04-20 04:00:00 UTC                                                                                                            |
| <b>Updated</b>         | 2017-07-11 01:32:00 UTC                                                                                                            |
| <b>Description</b>     | Cross-site scripting (XSS) vulnerability in PHPProjekt 4.2 and earlier allows remote attackers to inject arbitrary web script or I |

## Risk And Classification

**Problem Types:** NVD-CWE-Other

## NVD Known Affected Configurations (CPE 2.3)

| Type        | Vendor                    | Product                   | Version | Update | Edition | Language |
|-------------|---------------------------|---------------------------|---------|--------|---------|----------|
| Application | <a href="#">Phprojekt</a> | <a href="#">Phprojekt</a> | 4.2     | All    | All     | All      |
| Application | <a href="#">Phprojekt</a> | <a href="#">Phprojekt</a> | 4.2     | All    | All     | All      |
