Last Modified on: 03/23/2021 11:27:23 PM UTC

CVE-2005-3497

[Source: Mitre](#)[Source: NIST](#)[CVE.ORG](#)[Print: PDF](#) 

Certain versions of [Php Handicapper](#) from [Phphandicapper](#) contain the following vulnerability:

**** DISPUTED **** SQL injection vulnerability in process_signup.php in PHP Handicapper allows remote attackers to execute arbitrary SQL commands via the serviceid parameter. NOTE: on 20060210, the vendor disputed this issue, saying "this is 100% false reporting, this is a slander campaign from a customer who had a vulnerability in his

SERVER not the software." However, followup investigation strongly suggests that the original report is correct.

CVE-2005-3497 has been assigned by [M](#) cve@mitre.org to track the vulnerability

CVSS2 Score: **7.5 - HIGH**
