CVE-2005-4219

Source: Mitre

Source: NIST

CVE.ORG

Print: PDF

Certain versions of [Innovative Cms](#) from [Innovative Cms](#) contain the following vulnerability:

setting.php in Innovative CMS (ICMS, formerly Imoel-CMS) contains username and password information in cleartext, which might allow attackers to obtain this information via a direct request to setting.php. NOTE: on a properly configured web server, it would be expected that a .php file would be processed before content is returned to the user, so this might not be a vulnerability.

CVE-2005-4219 has been assigned by [M](#) cve@mitre.org to track the vulnerability

CVSS2 Score: **5 - MEDIUM**

Access Vector	Access Complexity	Authentication
