CVE-2006-0378

Source: Mitre

Source: NIST

CVE.ORG

Print: PDF

Certain versions of [X-site Manager](#) from [Netrix](#) contain the following vulnerability:

Cross-site scripting (XSS) vulnerability in Netrix X-Site Manager allows remote attackers to inject arbitrary web script or HTML via the `product_id` parameter, as originally demonstrated for a custom `mp3players_details.php` program. NOTE: the name of the affected program might be installation-dependent, but it has been identified as "`product_details.php`" by some sources.

CVE-2006-0378 has been assigned by [M](#) cve@mitre.org to track the vulnerability
