## Summary

|                 |                                                                                                                             |
|-----------------|-----------------------------------------------------------------------------------------------------------------------------|
| CVE             | CVE-2006-0698                                                                                                               |
| State           | PUBLISHED                                                                                                                   |
| Assigner        | mitre                                                                                                                       |
| Source Priority | CVE Program / NVD first with legacy fallback                                                                                |
| Published       | 2006-02-15 11:06:00 UTC                                                                                                     |
| Updated         | 2025-04-03 01:03:51 UTC                                                                                                     |
| Description     | Unspecified vulnerabilities in Zen Cart before 1.2.7 allow remote attackers to cause unknown impact via unspecified vectors |

## Risk And Classification

**Primary CVSS:** v2.0 10 from nvd@nist.gov

AV:N/AC:L/Au:N/C:C/I:C/A:C

**EPSS:** 0.004970000 probability, percentile 0.658590000 (date 2026-04-16)

**Problem Types:** NVD-CWE-Other | n/a
