## Summary

|                 |                                                                                                                                |
|-----------------|--------------------------------------------------------------------------------------------------------------------------------|
| CVE             | CVE-2006-2221                                                                                                                  |
| State           | PUBLISHED                                                                                                                      |
| Assigner        | mitre                                                                                                                          |
| Source Priority | CVE Program / NVD first with legacy fallback                                                                                   |
| Published       | 2006-05-05 19:02:00 UTC                                                                                                        |
| Updated         | 2025-04-03 01:03:51 UTC                                                                                                        |
| Description     | A third-party installer generation tool, possibly BitRock InstallBuilder, as used in products including Process-one ejabberd 1 |

## Risk And Classification

**Primary CVSS:** v2.0 2.1 from nvd@nist.gov

AV:L/AC:L/Au:N/C:N/I:N/A:P

**EPSS:** 0.000670000 probability, percentile 0.206330000 (date 2026-04-20)

**Problem Types:** NVD-CWE-Other | n/a
