

# CVE-2006-3604

[MITRE](#)[NVD](#)[CVE.ORG](#)[JSON API](#)[Print: PDF](#)

## Summary

|                        |                                                                                                                          |
|------------------------|--------------------------------------------------------------------------------------------------------------------------|
| <b>CVE</b>             | CVE-2006-3604                                                                                                            |
| <b>State</b>           | PUBLIC                                                                                                                   |
| <b>Assigner</b>        | cve@mitre.org                                                                                                            |
| <b>Source Priority</b> | CVE Program / NVD first with legacy fallback                                                                             |
| <b>Published</b>       | 2006-07-18 15:37:00 UTC                                                                                                  |
| <b>Updated</b>         | 2018-10-18 16:48:00 UTC                                                                                                  |
| <b>Description</b>     | Directory traversal vulnerability in FlexWATCH Network Camera 3.0 and earlier allows remote attackers to bypass access r |

## Risk And Classification

**Problem Types:** NVD-CWE-Other

## NVD Known Affected Configurations (CPE 2.3)

| Type        | Vendor | Product                  | Version | Update | Edition | Language |
|-------------|--------|--------------------------|---------|--------|---------|----------|
| Application | Seyeon | Flexwatch Network Camera | All     | All    | All     | All      |
