

# CVE-2006-4039

[MITRE](#)[NVD](#)[CVE.ORG](#)[JSON API](#)[Print: PDF](#)

## Summary

|                        |                                                                                                                                          |
|------------------------|------------------------------------------------------------------------------------------------------------------------------------------|
| <b>CVE</b>             | CVE-2006-4039                                                                                                                            |
| <b>State</b>           | PUBLIC                                                                                                                                   |
| <b>Assigner</b>        | cve@mitre.org                                                                                                                            |
| <b>Source Priority</b> | CVE Program / NVD first with legacy fallback                                                                                             |
| <b>Published</b>       | 2006-08-09 22:04:00 UTC                                                                                                                  |
| <b>Updated</b>         | 2018-10-17 21:33:00 UTC                                                                                                                  |
| <b>Description</b>     | Multiple SQL injection vulnerabilities in eintragen.php in GaesteChaos 0.2 and earlier allow remote attackers to execute arbitrary code. |

## Risk And Classification

### Problem Types: CWE-89

## NVD Known Affected Configurations (CPE 2.3)

| Type        | Vendor    | Product     | Version | Update | Edition | Language |
|-------------|-----------|-------------|---------|--------|---------|----------|
| Application | Chaossoft | Gaestechaos | All     | All    | All     | All      |
