

# CVE-2006-5076

[MITRE](#)[NVD](#)[CVE.ORG](#)[JSON API](#)[Print: PDF](#)

## Summary

|                        |                                                                                                                                                              |
|------------------------|--------------------------------------------------------------------------------------------------------------------------------------------------------------|
| <b>CVE</b>             | CVE-2006-5076                                                                                                                                                |
| <b>State</b>           | PUBLIC                                                                                                                                                       |
| <b>Assigner</b>        | cve@mitre.org                                                                                                                                                |
| <b>Source Priority</b> | CVE Program / NVD first with legacy fallback                                                                                                                 |
| <b>Published</b>       | 2006-09-29 00:07:00 UTC                                                                                                                                      |
| <b>Updated</b>         | 2018-10-17 21:41:00 UTC                                                                                                                                      |
| <b>Description</b>     | Multiple PHP remote file inclusion vulnerabilities in OpenConcept Back-End 0.4.5 allow remote attackers to execute arbitrary code via crafted HTTP requests. |

## Risk And Classification

**Problem Types:** NVD-CWE-Other

## NVD Known Affected Configurations (CPE 2.3)

| Type        | Vendor                   | Product                      | Version | Update | Edition | Language |
|-------------|--------------------------|------------------------------|---------|--------|---------|----------|
| Application | <a href="#">Back-end</a> | <a href="#">Back-end Cms</a> | 0.4.5   | All    | All     | All      |
| Application | <a href="#">Back-end</a> | <a href="#">Back-end Cms</a> | 0.4.5   | All    | All     | All      |
