

# CVE-2006-5521

[MITRE](#)[NVD](#)[CVE.ORG](#)[JSON API](#)[Print: PDF](#)

## Summary

|                        |                                                                                                                                                            |
|------------------------|------------------------------------------------------------------------------------------------------------------------------------------------------------|
| <b>CVE</b>             | CVE-2006-5521                                                                                                                                              |
| <b>State</b>           | PUBLIC                                                                                                                                                     |
| <b>Assigner</b>        | cve@mitre.org                                                                                                                                              |
| <b>Source Priority</b> | CVE Program / NVD first with legacy fallback                                                                                                               |
| <b>Published</b>       | 2006-10-26 16:07:00 UTC                                                                                                                                    |
| <b>Updated</b>         | 2017-10-19 01:29:00 UTC                                                                                                                                    |
| <b>Description</b>     | PHP remote file inclusion vulnerability in DNS/RR.php in Net_DNS 0.03 and earlier allows remote attackers to execute arbitrary code via a crafted request. |

## Risk And Classification

**Problem Types:** NVD-CWE-Other

## NVD Known Affected Configurations (CPE 2.3)

| Type        | Vendor  | Product | Version | Update | Edition | Language |
|-------------|---------|---------|---------|--------|---------|----------|
| Application | Net Dns | Net Dns | All     | All    | All     | All      |
