

# CVE-2006-5657

[MITRE](#)[NVD](#)[CVE.ORG](#)[JSON API](#)[Print: PDF](#)

## Summary

|                        |                                                                                                              |
|------------------------|--------------------------------------------------------------------------------------------------------------|
| <b>CVE</b>             | CVE-2006-5657                                                                                                |
| <b>State</b>           | PUBLIC                                                                                                       |
| <b>Assigner</b>        | cve@mitre.org                                                                                                |
| <b>Source Priority</b> | CVE Program / NVD first with legacy fallback                                                                 |
| <b>Published</b>       | 2006-11-03 00:07:00 UTC                                                                                      |
| <b>Updated</b>         | 2011-03-08 02:43:00 UTC                                                                                      |
| <b>Description</b>     | Multiple off-by-one errors in src/text.c in Vilistextum before 2.6.9 have unknown impact and attack vectors. |

## Risk And Classification

**Problem Types:** NVD-CWE-Other

## NVD Known Affected Configurations (CPE 2.3)

| Type        | Vendor                      | Product                     | Version | Update | Edition | Language |
|-------------|-----------------------------|-----------------------------|---------|--------|---------|----------|
| Application | <a href="#">Vilistextum</a> | <a href="#">Vilistextum</a> | All     | All    | All     | All      |
