

# CVE-2006-5674

[MITRE](#)[NVD](#)[CVE.ORG](#)[JSON API](#)[Print: PDF](#)

## Summary

|                        |                                                                                                                                |
|------------------------|--------------------------------------------------------------------------------------------------------------------------------|
| <b>CVE</b>             | CVE-2006-5674                                                                                                                  |
| <b>State</b>           | PUBLIC                                                                                                                         |
| <b>Assigner</b>        | cve@mitre.org                                                                                                                  |
| <b>Source Priority</b> | CVE Program / NVD first with legacy fallback                                                                                   |
| <b>Published</b>       | 2006-11-03 01:07:00 UTC                                                                                                        |
| <b>Updated</b>         | 2008-11-13 06:25:00 UTC                                                                                                        |
| <b>Description</b>     | Multiple PHP remote file inclusion vulnerabilities in miniBB 2.0.2 and earlier, when register_globals is enabled, allow remote |

## Risk And Classification

**Problem Types:** NVD-CWE-Other

## NVD Known Affected Configurations (CPE 2.3)

| Type        | Vendor | Product | Version | Update | Edition | Language |
|-------------|--------|---------|---------|--------|---------|----------|
| Application | Minibb | Minibb  | All     | All    | All     | All      |

## References
