CVE-2006-6308

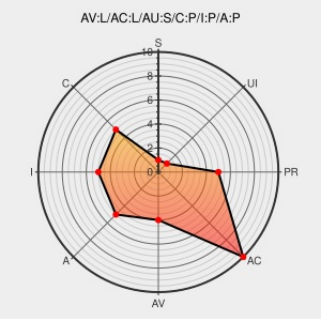
Source: Mitre | Source: NIST | CVE.ORG | Print: PDF



Certain versions of Livestate Agent For Windows from Symantec contain the following vulnerability:

** DISPUTED ** Symantec LiveState 7.1 Agent for Windows allows local users to gain privileges by stopping the shstart.exe process and open "Web Self-Service" from the system tray icon, which will open a browser window running with elevated privileges. NOTE: several third-party researchers have noted that administrator privileges may be necessary to terminate shstart.exe. If this is the case, then no privilege escalation occurs, and this is not a vulnerability.

CVE-2006-6308 has been assigned by cve@mitre.org to track the vulnerability

CVSS2 Score: 4.3 - MEDIUM
