

# CVE-2006-6678

[MITRE](#)[NVD](#)[CVE.ORG](#)[JSON API](#)[Print: PDF](#)

## Summary

|                        |                                                                                                                                  |
|------------------------|----------------------------------------------------------------------------------------------------------------------------------|
| <b>CVE</b>             | CVE-2006-6678                                                                                                                    |
| <b>State</b>           | PUBLIC                                                                                                                           |
| <b>Assigner</b>        | cve@mitre.org                                                                                                                    |
| <b>Source Priority</b> | CVE Program / NVD first with legacy fallback                                                                                     |
| <b>Published</b>       | 2006-12-21 01:28:00 UTC                                                                                                          |
| <b>Updated</b>         | 2011-03-08 02:46:00 UTC                                                                                                          |
| <b>Description</b>     | The edit_textarea function in form-file.c in Netrik 1.15.4 and earlier does not properly verify temporary filenames when editing |

## Risk And Classification

**Problem Types:** NVD-CWE-Other

## NVD Known Affected Configurations (CPE 2.3)

| Type        | Vendor                 | Product                | Version | Update | Edition | Language |
|-------------|------------------------|------------------------|---------|--------|---------|----------|
| Application | <a href="#">Netrik</a> | <a href="#">Netrik</a> | 1.15.2  | All    | All     | All      |
| Application | <a href="#">Netrik</a> | <a href="#">Netrik</a> | 1.15.2  | All    | All     | All      |
| Application | <a href="#">Netrik</a> | <a href="#">Netrik</a> | All     | All    | All     | All      |
