CVE-2007-1462

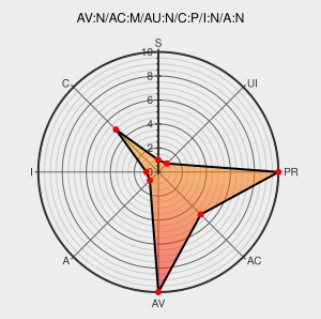
Source: Mitre | Source: NIST | CVE.ORG | Print: PDF



Certain versions of Conga from Conga contain the following vulnerability:

The luci server component in conga preserves the password between page loads for the Add System/Cluster task flow by storing the password in the Value attribute of a password entry field, which allows attackers to steal the password by performing a "view source" or other operation to obtain the web page. NOTE: there are limited circumstances under which such an attack is feasible.

CVE-2007-1462 has been assigned by secalert@redhat.com to track the vulnerability

CVSS2 Score: 4.3 - MEDIUM

Access Vector	Access Complexity	Authentication
NETWORK	MEDIUM	NONE
