

# CVE-2007-2171

[MITRE](#)[NVD](#)[CVE.ORG](#)[JSON API](#)[Print: PDF](#)

## Summary

|                        |                                                                                                                    |
|------------------------|--------------------------------------------------------------------------------------------------------------------|
| <b>CVE</b>             | CVE-2007-2171                                                                                                      |
| <b>State</b>           | PUBLIC                                                                                                             |
| <b>Assigner</b>        | cve@mitre.org                                                                                                      |
| <b>Source Priority</b> | CVE Program / NVD first with legacy fallback                                                                       |
| <b>Published</b>       | 2007-04-24 20:19:00 UTC                                                                                            |
| <b>Updated</b>         | 2018-10-16 16:42:00 UTC                                                                                            |
| <b>Description</b>     | Stack-based buffer overflow in the base64_decode function in GWINTER.exe in Novell GroupWise (GW) WebAccess before |

## Risk And Classification

**Problem Types:** NVD-CWE-Other

## NVD Known Affected Configurations (CPE 2.3)

| Type        | Vendor                 | Product                   | Version | Update | Edition | Language |
|-------------|------------------------|---------------------------|---------|--------|---------|----------|
| Application | <a href="#">Novell</a> | <a href="#">Groupwise</a> | 7.0     | All    | All     | All      |
| Application | <a href="#">Novell</a> | <a href="#">Groupwise</a> | 7.0     | sp1    | All     | All      |
| Application | <a href="#">Novell</a> | <a href="#">Groupwise</a> | 7.0     | All    | All     | All      |
| Application | <a href="#">Novell</a> | <a href="#">Groupwise</a> | 7.0     | sp1    | All     | All      |
