

# CVE-2007-2767

[MITRE](#)[NVD](#)[CVE.ORG](#)[JSON API](#)[Print: PDF](#)

## Summary

|                        |                                                                                                                             |
|------------------------|-----------------------------------------------------------------------------------------------------------------------------|
| <b>CVE</b>             | CVE-2007-2767                                                                                                               |
| <b>State</b>           | PUBLIC                                                                                                                      |
| <b>Assigner</b>        | cve@mitre.org                                                                                                               |
| <b>Source Priority</b> | CVE Program / NVD first with legacy fallback                                                                                |
| <b>Published</b>       | 2007-05-21 20:30:00 UTC                                                                                                     |
| <b>Updated</b>         | 2017-07-29 01:31:00 UTC                                                                                                     |
| <b>Description</b>     | Unspecified vulnerability in BES before 3.5.0 in OPeNDAP 4 (Hydrax) before 1.2.1 allows remote attackers to list filesystem |

## Risk And Classification

**Problem Types:** NVD-CWE-Other

## NVD Known Affected Configurations (CPE 2.3)

| Type        | Vendor                  | Product                | Version | Update | Edition | Language |
|-------------|-------------------------|------------------------|---------|--------|---------|----------|
| Application | <a href="#">Opendap</a> | <a href="#">Bes</a>    | All     | All    | All     | All      |
| Application | <a href="#">Opendap</a> | <a href="#">Hydrax</a> | 1.2     | All    | All     | All      |
| Application | <a href="#">Opendap</a> | <a href="#">Hydrax</a> | 1.2     | All    | All     | All      |
