

# CVE-2007-4187

[MITRE](#)[NVD](#)[CVE.ORG](#)[Print: PDF](#)

## Summary

|                        |                                                                                                                                                |
|------------------------|------------------------------------------------------------------------------------------------------------------------------------------------|
| <b>CVE</b>             | CVE-2007-4187                                                                                                                                  |
| <b>State</b>           | PUBLIC                                                                                                                                         |
| <b>Assigner</b>        | cve@mitre.org                                                                                                                                  |
| <b>Source Priority</b> | CVE Program / NVD first with legacy fallback                                                                                                   |
| <b>Published</b>       | 2007-08-08 01:17:00 UTC                                                                                                                        |
| <b>Updated</b>         | 2018-10-15 21:33:00 UTC                                                                                                                        |
| <b>Description</b>     | Multiple eval injection vulnerabilities in the com_search component in Joomla! 1.5 beta before RC1 (aka Mapya) allow remote command execution. |

## Risk And Classification

### Problem Types: CWE-94

## NVD Known Affected Configurations (CPE 2.3)

| Type        | Vendor                 | Product                | Version    | Update | Edition | Language |
|-------------|------------------------|------------------------|------------|--------|---------|----------|
| Application | <a href="#">Joomla</a> | <a href="#">Joomla</a> | 1.5.0_beta | All    | All     | All      |
| Application | <a href="#">Joomla</a> | <a href="#">Joomla</a> | 1.5.0_beta | All    | All     | All      |
