

# CVE-2007-4639

[MITRE](#)[NVD](#)[CVE.ORG](#)[JSON API](#)[Print: PDF](#)

## Summary

|                        |                                                                                                                            |
|------------------------|----------------------------------------------------------------------------------------------------------------------------|
| <b>CVE</b>             | CVE-2007-4639                                                                                                              |
| <b>State</b>           | PUBLIC                                                                                                                     |
| <b>Assigner</b>        | cve@mitre.org                                                                                                              |
| <b>Source Priority</b> | CVE Program / NVD first with legacy fallback                                                                               |
| <b>Published</b>       | 2007-08-31 23:17:00 UTC                                                                                                    |
| <b>Updated</b>         | 2018-10-15 21:36:00 UTC                                                                                                    |
| <b>Description</b>     | EnterpriseDB Advanced Server 8.2 does not properly handle certain debugging function calls that occur before a call to pld |

## Risk And Classification

### Problem Types: CWE-94

## NVD Known Affected Configurations (CPE 2.3)

| Type        | Vendor                       | Product                                      | Version | Update | Edition | Language |
|-------------|------------------------------|----------------------------------------------|---------|--------|---------|----------|
| Application | <a href="#">Enterprisedb</a> | <a href="#">Enterprisedb Advanced Server</a> | 8.2     | All    | All     | All      |
| Application | <a href="#">Enterprisedb</a> | <a href="#">Enterprisedb Advanced Server</a> | 8.2     | All    | All     | All      |
