CVE-2007-4961

Source: Mitre

Source: NIST

CVE.ORG

Print: PDF 

Certain versions of [Second Life](#) from [Linden Lab](#) contain the following vulnerability:

The login_to_simulator method in Linden Lab Second Life, as used by the secondlife:// protocol handler and possibly other Second Life login mechanisms, sends an MD5 hash in cleartext in the passwd field, which allows remote attackers to login to an account by sniffing the network and then sending this hash to a Second Life authentication

server.

CVE-2007-4961 has been assigned by  cve@mitre.org to track the vulnerability

CVSS2 Score: 4.3 - MEDIUM

Access Vector	Access Complexity	Authentication
NETWORK	MEDIUM	NONE
Confidentiality Impact	Integrity Impact	Availability Impact
PARTIAL	NONE	NONE
