

# CVE-2007-4996

[MITRE](#)[NVD](#)[CVE.ORG](#)[JSON API](#)[Print: PDF](#)

## Summary

|                        |                                                                                                                         |
|------------------------|-------------------------------------------------------------------------------------------------------------------------|
| <b>CVE</b>             | CVE-2007-4996                                                                                                           |
| <b>State</b>           | PUBLIC                                                                                                                  |
| <b>Assigner</b>        | secalert@redhat.com                                                                                                     |
| <b>Source Priority</b> | CVE Program / NVD first with legacy fallback                                                                            |
| <b>Published</b>       | 2007-10-01 20:17:00 UTC                                                                                                 |
| <b>Updated</b>         | 2018-10-15 21:39:00 UTC                                                                                                 |
| <b>Description</b>     | libpurple in Pidgin before 2.2.1 does not properly handle MSN nudge messages from users who are not on the receiver's b |

## Risk And Classification

**Problem Types:** NVD-CWE-Other

## NVD Known Affected Configurations (CPE 2.3)

| Type        | Vendor                 | Product                | Version | Update | Edition | Language |
|-------------|------------------------|------------------------|---------|--------|---------|----------|
| Application | <a href="#">Pidgin</a> | <a href="#">Pidgin</a> | 2.2.0   | All    | All     | All      |
| Application | <a href="#">Pidgin</a> | <a href="#">Pidgin</a> | 2.2.0   | All    | All     | All      |
