

# CVE-2007-6051

[MITRE](#)[NVD](#)[CVE.ORG](#)[JSON API](#)[Print: PDF](#)

## Summary

|                        |                                                                                                                     |
|------------------------|---------------------------------------------------------------------------------------------------------------------|
| <b>CVE</b>             | CVE-2007-6051                                                                                                       |
| <b>State</b>           | PUBLIC                                                                                                              |
| <b>Assigner</b>        | cve@mitre.org                                                                                                       |
| <b>Source Priority</b> | CVE Program / NVD first with legacy fallback                                                                        |
| <b>Published</b>       | 2007-11-20 20:46:00 UTC                                                                                             |
| <b>Updated</b>         | 2012-10-31 02:46:00 UTC                                                                                             |
| <b>Description</b>     | IBM DB2 UDB 9.1 before Fixpak 4 assigns incorrect privileges to the (1) DB2ADMNS and (2) DB2USERS alternative group |

## Risk And Classification

### Problem Types: CWE-264

## NVD Known Affected Configurations (CPE 2.3)

| Type             | Vendor                    | Product                                | Version | Update | Edition | Language |
|------------------|---------------------------|----------------------------------------|---------|--------|---------|----------|
| Application      | <a href="#">Ibm</a>       | <a href="#">Db2 Universal Database</a> | All     | All    | fp3a    | All      |
| Operating System | <a href="#">Linux</a>     | <a href="#">Linux Kernel</a>           | All     | All    | All     | All      |
| Operating System | <a href="#">Linux</a>     | <a href="#">Linux Kernel</a>           | All     | All    | All     | All      |
