

# CVE-2007-6083

[MITRE](#)[NVD](#)[CVE.ORG](#)[JSON API](#)[Print: PDF](#)

## Summary

|                        |                                                                                                                           |
|------------------------|---------------------------------------------------------------------------------------------------------------------------|
| <b>CVE</b>             | CVE-2007-6083                                                                                                             |
| <b>State</b>           | PUBLIC                                                                                                                    |
| <b>Assigner</b>        | cve@mitre.org                                                                                                             |
| <b>Source Priority</b> | CVE Program / NVD first with legacy fallback                                                                              |
| <b>Published</b>       | 2007-11-22 00:46:00 UTC                                                                                                   |
| <b>Updated</b>         | 2018-10-15 21:49:00 UTC                                                                                                   |
| <b>Description</b>     | SQL injection vulnerability in admin/index.php in IceBB 1.0-rc6 allows remote attackers to execute arbitrary SQL commands |

## Risk And Classification

### Problem Types: CWE-89

## NVD Known Affected Configurations (CPE 2.3)

| Type        | Vendor                | Product               | Version | Update | Edition | Language |
|-------------|-----------------------|-----------------------|---------|--------|---------|----------|
| Application | <a href="#">Icebb</a> | <a href="#">Icebb</a> | 1.0-rc6 | All    | All     | All      |
| Application | <a href="#">Icebb</a> | <a href="#">Icebb</a> | 1.0-rc6 | All    | All     | All      |
