

# CVE-2007-6260

[MITRE](#)[NVD](#)[CVE.ORG](#)[JSON API](#)[Print: PDF](#)

## Summary

|                        |                                                                                                                                                      |
|------------------------|------------------------------------------------------------------------------------------------------------------------------------------------------|
| <b>CVE</b>             | CVE-2007-6260                                                                                                                                        |
| <b>State</b>           | PUBLIC                                                                                                                                               |
| <b>Assigner</b>        | cve@mitre.org                                                                                                                                        |
| <b>Source Priority</b> | CVE Program / NVD first with legacy fallback                                                                                                         |
| <b>Published</b>       | 2007-12-06 02:46:00 UTC                                                                                                                              |
| <b>Updated</b>         | 2018-10-15 21:51:00 UTC                                                                                                                              |
| <b>Description</b>     | The installation process for Oracle 10g and 11g uses accounts with default passwords, which allows remote attackers to obtain administrative access. |

## Risk And Classification

### Problem Types: CWE-255

## NVD Known Affected Configurations (CPE 2.3)

| Type        | Vendor                 | Product                         | Version | Update | Edition | Language |
|-------------|------------------------|---------------------------------|---------|--------|---------|----------|
| Application | <a href="#">Oracle</a> | <a href="#">Database Server</a> | All     | All    | All     | All      |
| Application | <a href="#">Oracle</a> | <a href="#">Database Server</a> | All     | All    | All     | All      |
