

# CVE-2007-6452

[MITRE](#)[NVD](#)[CVE.ORG](#)[JSON API](#)[Print: PDF](#)

## Summary

|                        |                                                                                                                           |
|------------------------|---------------------------------------------------------------------------------------------------------------------------|
| <b>CVE</b>             | CVE-2007-6452                                                                                                             |
| <b>State</b>           | PUBLIC                                                                                                                    |
| <b>Assigner</b>        | cve@mitre.org                                                                                                             |
| <b>Source Priority</b> | CVE Program / NVD first with legacy fallback                                                                              |
| <b>Published</b>       | 2007-12-20 00:46:00 UTC                                                                                                   |
| <b>Updated</b>         | 2017-08-08 01:29:00 UTC                                                                                                   |
| <b>Description</b>     | Unspecified vulnerability in the benchmark reporting system in Google Web Toolkit (GWT) before 1.4.61 has unknown impact. |

## Risk And Classification

### Problem Types: CWE-79

## NVD Known Affected Configurations (CPE 2.3)

| Type        | Vendor | Product     | Version | Update | Edition | Language |
|-------------|--------|-------------|---------|--------|---------|----------|
| Application | Google | Web Toolkit | All     | All    | All     | All      |
