

# CVE-2008-0584

[MITRE](#)[NVD](#)[CVE.ORG](#)[JSON API](#)[Print: PDF](#)

## Summary

|                        |                                                                                                                                  |
|------------------------|----------------------------------------------------------------------------------------------------------------------------------|
| <b>CVE</b>             | CVE-2008-0584                                                                                                                    |
| <b>State</b>           | PUBLIC                                                                                                                           |
| <b>Assigner</b>        | cve@mitre.org                                                                                                                    |
| <b>Source Priority</b> | CVE Program / NVD first with legacy fallback                                                                                     |
| <b>Published</b>       | 2008-02-05 03:00:00 UTC                                                                                                          |
| <b>Updated</b>         | 2017-09-29 01:30:00 UTC                                                                                                          |
| <b>Description</b>     | Multiple buffer overflows in bos.rte.control in IBM AIX 5.2 and 5.3 allow local users to gain privileges via unspecified vectors |

## Risk And Classification

### Problem Types: CWE-264

## NVD Known Affected Configurations (CPE 2.3)

| Type             | Vendor              | Product             | Version | Update | Edition | Language |
|------------------|---------------------|---------------------|---------|--------|---------|----------|
| Operating System | <a href="#">Ibm</a> | <a href="#">Aix</a> | 5.2     | All    | All     | All      |
| Operating System | <a href="#">Ibm</a> | <a href="#">Aix</a> | 5.3     | All    | All     | All      |
| Operating System | <a href="#">Ibm</a> | <a href="#">Aix</a> | 5.2     | All    | All     | All      |
| Operating System | <a href="#">Ibm</a> | <a href="#">Aix</a> | 5.3     | All    | All     | All      |
