| Description     | Multiple cross-site scripting (XSS) vulnerabilities in the DMSGuestbook 1.8.0 and 1.7.0 plugin for WordPress allow remote attackers to inject arbitrary web script and HTML via the "comment" parameter to the "comment.php" script. The vulnerability exists in the "comment.php" script, which is located in the "wp-content/plugins/dmsguestbook" directory. The vulnerability is caused by the lack of proper sanitization of the "comment" parameter. The vulnerability is present in versions 1.7.0 and 1.8.0 of the DMSGuestbook plugin. |

## Risk And Classification

**Primary CVSS:** v2.0 4.3 from nvd@nist.gov
