

# CVE-2008-0654

[MITRE](#)[NVD](#)[CVE.ORG](#)[JSON API](#)[Print: PDF](#)

## Summary

|                        |                                                                                                                                  |
|------------------------|----------------------------------------------------------------------------------------------------------------------------------|
| <b>CVE</b>             | CVE-2008-0654                                                                                                                    |
| <b>State</b>           | PUBLIC                                                                                                                           |
| <b>Assigner</b>        | cve@mitre.org                                                                                                                    |
| <b>Source Priority</b> | CVE Program / NVD first with legacy fallback                                                                                     |
| <b>Published</b>       | 2008-02-07 21:00:00 UTC                                                                                                          |
| <b>Updated</b>         | 2018-10-15 22:02:00 UTC                                                                                                          |
| <b>Description</b>     | Multiple directory traversal vulnerabilities in Azucar CMS 1.3 allow remote attackers to include and execute arbitrary local fil |

## Risk And Classification

### Problem Types: CWE-22

## NVD Known Affected Configurations (CPE 2.3)

| Type        | Vendor                     | Product                    | Version | Update | Edition | Language |
|-------------|----------------------------|----------------------------|---------|--------|---------|----------|
| Application | <a href="#">Azucar Cms</a> | <a href="#">Azucar Cms</a> | 1.3     | All    | All     | All      |
| Application | <a href="#">Azucar Cms</a> | <a href="#">Azucar Cms</a> | 1.3     | All    | All     | All      |
