

# CVE-2008-1939

[MITRE](#)[NVD](#)[CVE.ORG](#)[JSON API](#)[Print: PDF](#)

## Summary

|                        |                                                                                                                         |
|------------------------|-------------------------------------------------------------------------------------------------------------------------|
| <b>CVE</b>             | CVE-2008-1939                                                                                                           |
| <b>State</b>           | PUBLIC                                                                                                                  |
| <b>Assigner</b>        | cve@mitre.org                                                                                                           |
| <b>Source Priority</b> | CVE Program / NVD first with legacy fallback                                                                            |
| <b>Published</b>       | 2008-04-25 06:05:00 UTC                                                                                                 |
| <b>Updated</b>         | 2017-09-29 01:30:00 UTC                                                                                                 |
| <b>Description</b>     | Multiple SQL injection vulnerabilities in W1L3D4 Philboard 1.0 allow remote attackers to execute arbitrary SQL commands |

## Risk And Classification

### Problem Types: CWE-89

## NVD Known Affected Configurations (CPE 2.3)

| Type        | Vendor                   | Product                   | Version | Update | Edition | Language |
|-------------|--------------------------|---------------------------|---------|--------|---------|----------|
| Application | <a href="#">Aspindir</a> | <a href="#">Philboard</a> | 1.0     | All    | All     | All      |
| Application | <a href="#">Aspindir</a> | <a href="#">Philboard</a> | 1.0     | All    | All     | All      |
