

# CVE-2008-3109

[MITRE](#)[NVD](#)[CVE.ORG](#)[JSON API](#)[Print: PDF](#)

## Summary

|                        |                                                                                                                         |
|------------------------|-------------------------------------------------------------------------------------------------------------------------|
| <b>CVE</b>             | CVE-2008-3109                                                                                                           |
| <b>State</b>           | PUBLIC                                                                                                                  |
| <b>Assigner</b>        | cve@mitre.org                                                                                                           |
| <b>Source Priority</b> | CVE Program / NVD first with legacy fallback                                                                            |
| <b>Published</b>       | 2008-07-09 23:41:00 UTC                                                                                                 |
| <b>Updated</b>         | 2018-10-11 20:46:00 UTC                                                                                                 |
| <b>Description</b>     | Unspecified vulnerability in scripting language support in Sun Java Runtime Environment (JRE) in JDK and JRE 6 Update 6 |

## Risk And Classification

### Problem Types: CWE-264

## NVD Known Affected Configurations (CPE 2.3)

| Type        | Vendor              | Product             | Version | Update   | Edition | Language |
|-------------|---------------------|---------------------|---------|----------|---------|----------|
| Application | <a href="#">Sun</a> | <a href="#">Jdk</a> | 6       | update_1 | All     | All      |
| Application | <a href="#">Sun</a> | <a href="#">Jdk</a> | 6       | update_2 | All     | All      |
| Application | <a href="#">Sun</a> | <a href="#">Jdk</a> | 6       | update_3 | All     | All      |
| Application | <a href="#">Sun</a> | <a href="#">Jdk</a> | 6       | update_4 | All     | All      |
