

# CVE-2008-6045

[MITRE](#)[NVD](#)[CVE.ORG](#)[JSON API](#)[Print: PDF](#)

## Summary

|                        |                                                                                                                              |
|------------------------|------------------------------------------------------------------------------------------------------------------------------|
| <b>CVE</b>             | CVE-2008-6045                                                                                                                |
| <b>State</b>           | PUBLIC                                                                                                                       |
| <b>Assigner</b>        | cve@mitre.org                                                                                                                |
| <b>Source Priority</b> | CVE Program / NVD first with legacy fallback                                                                                 |
| <b>Published</b>       | 2009-02-03 11:30:00 UTC                                                                                                      |
| <b>Updated</b>         | 2018-10-11 20:56:00 UTC                                                                                                      |
| <b>Description</b>     | Session fixation vulnerability in shopping_cart.php in xt:Commerce 3.0.4 and earlier allows remote attackers to hijack web s |

## Risk And Classification

### Problem Types: CWE-287

## NVD Known Affected Configurations (CPE 2.3)

| Type        | Vendor                      | Product                     | Version | Update | Edition | Language |
|-------------|-----------------------------|-----------------------------|---------|--------|---------|----------|
| Application | <a href="#">Xt-commerce</a> | <a href="#">Xt-commerce</a> | All     | All    | All     | All      |
