

# CVE-2009-0491

[MITRE](#)[NVD](#)[CVE.ORG](#)[JSON API](#)[Print: PDF](#)

## Summary

|                        |                                                                                                                          |
|------------------------|--------------------------------------------------------------------------------------------------------------------------|
| <b>CVE</b>             | CVE-2009-0491                                                                                                            |
| <b>State</b>           | PUBLIC                                                                                                                   |
| <b>Assigner</b>        | cve@mitre.org                                                                                                            |
| <b>Source Priority</b> | CVE Program / NVD first with legacy fallback                                                                             |
| <b>Published</b>       | 2009-02-10 01:30:00 UTC                                                                                                  |
| <b>Updated</b>         | 2017-09-29 01:33:00 UTC                                                                                                  |
| <b>Description</b>     | Stack-based buffer overflow in Elecard MPEG Player 5.5 build 15884.081218 allows remote attackers to execute arbitrary c |

## Risk And Classification

### Problem Types: CWE-119

## NVD Known Affected Configurations (CPE 2.3)

| Type        | Vendor  | Product             | Version | Update | Edition | Language |
|-------------|---------|---------------------|---------|--------|---------|----------|
| Application | Elecard | Elecard Mpeg Player | All     | All    | All     | All      |

## References

| Reference                                                                                                              | Source     | Link               |
