

# CVE-2009-0570

[MITRE](#)[NVD](#)[CVE.ORG](#)[JSON API](#)[Print: PDF](#)

## Summary

|                        |                                                                                                                              |
|------------------------|------------------------------------------------------------------------------------------------------------------------------|
| <b>CVE</b>             | CVE-2009-0570                                                                                                                |
| <b>State</b>           | PUBLIC                                                                                                                       |
| <b>Assigner</b>        | cve@mitre.org                                                                                                                |
| <b>Source Priority</b> | CVE Program / NVD first with legacy fallback                                                                                 |
| <b>Published</b>       | 2009-02-13 17:30:00 UTC                                                                                                      |
| <b>Updated</b>         | 2017-09-29 01:33:00 UTC                                                                                                      |
| <b>Description</b>     | Directory traversal vulnerability in send.php in Ninja Designs Mailist 3.0, when register_globals is enabled and magic_quote |

## Risk And Classification

### Problem Types: CWE-22

## NVD Known Affected Configurations (CPE 2.3)

| Type        | Vendor                       | Product                 | Version | Update | Edition | Language |
|-------------|------------------------------|-------------------------|---------|--------|---------|----------|
| Application | <a href="#">Ninjadesigns</a> | <a href="#">Mailist</a> | 3.0     | All    | All     | All      |
| Application | <a href="#">Ninjadesigns</a> | <a href="#">Mailist</a> | 3.0     | All    | All     | All      |
