

# CVE-2009-1319

[MITRE](#)[NVD](#)[CVE.ORG](#)[JSON API](#)[Print: PDF](#)

## Summary

|                        |                                                                                                                                          |
|------------------------|------------------------------------------------------------------------------------------------------------------------------------------|
| <b>CVE</b>             | CVE-2009-1319                                                                                                                            |
| <b>State</b>           | PUBLIC                                                                                                                                   |
| <b>Assigner</b>        | cve@mitre.org                                                                                                                            |
| <b>Source Priority</b> | CVE Program / NVD first with legacy fallback                                                                                             |
| <b>Published</b>       | 2009-04-17 14:08:00 UTC                                                                                                                  |
| <b>Updated</b>         | 2017-09-29 01:34:00 UTC                                                                                                                  |
| <b>Description</b>     | Directory traversal vulnerability in includes/ini.inc.php in GuestCal 2.1 allows remote attackers to include and execute arbitrary code. |

## Risk And Classification

### Problem Types: CWE-22

## NVD Known Affected Configurations (CPE 2.3)

| Type        | Vendor                   | Product                   | Version | Update | Edition | Language |
|-------------|--------------------------|---------------------------|---------|--------|---------|----------|
| Application | <a href="#">Guestcal</a> | <a href="#">Guest Cal</a> | 2.1     | All    | All     | All      |
| Application | <a href="#">Guestcal</a> | <a href="#">Guest Cal</a> | 2.1     | All    | All     | All      |
