

# CVE-2009-2025

[MITRE](#)[NVD](#)[CVE.ORG](#)[JSON API](#)[Print: PDF](#)

## Summary

|                        |                                                                                                                         |
|------------------------|-------------------------------------------------------------------------------------------------------------------------|
| <b>CVE</b>             | CVE-2009-2025                                                                                                           |
| <b>State</b>           | PUBLIC                                                                                                                  |
| <b>Assigner</b>        | cve@mitre.org                                                                                                           |
| <b>Source Priority</b> | CVE Program / NVD first with legacy fallback                                                                            |
| <b>Published</b>       | 2009-06-09 19:30:00 UTC                                                                                                 |
| <b>Updated</b>         | 2017-09-29 01:34:00 UTC                                                                                                 |
| <b>Description</b>     | admin/login.php in DM FileManager 3.9.2 allows remote attackers to bypass authentication and gain administrative access |

## Risk And Classification

### Problem Types: CWE-264

## NVD Known Affected Configurations (CPE 2.3)

| Type        | Vendor                      | Product                        | Version | Update | Edition | Language |
|-------------|-----------------------------|--------------------------------|---------|--------|---------|----------|
| Application | <a href="#">Dutchmonkey</a> | <a href="#">Dm Filemanager</a> | 3.9.2   | All    | All     | All      |
| Application | <a href="#">Dutchmonkey</a> | <a href="#">Dm Filemanager</a> | 3.9.2   | All    | All     | All      |
