

# CVE-2009-2041

[MITRE](#)[NVD](#)[CVE.ORG](#)[JSON API](#)[Print: PDF](#)

## Summary

|                        |                                                                                                                                 |
|------------------------|---------------------------------------------------------------------------------------------------------------------------------|
| <b>CVE</b>             | CVE-2009-2041                                                                                                                   |
| <b>State</b>           | PUBLIC                                                                                                                          |
| <b>Assigner</b>        | cve@mitre.org                                                                                                                   |
| <b>Source Priority</b> | CVE Program / NVD first with legacy fallback                                                                                    |
| <b>Published</b>       | 2009-06-12 20:30:00 UTC                                                                                                         |
| <b>Updated</b>         | 2017-08-17 01:30:00 UTC                                                                                                         |
| <b>Description</b>     | Cross-site scripting (XSS) vulnerability in A51 D.O.O. activeCollab 0.7.1 allows remote attackers to inject arbitrary web scrip |

## Risk And Classification

### Problem Types: CWE-79

## NVD Known Affected Configurations (CPE 2.3)

| Type        | Vendor                       | Product                      | Version | Update | Edition | Language |
|-------------|------------------------------|------------------------------|---------|--------|---------|----------|
| Application | <a href="#">Activecollab</a> | <a href="#">Activecollab</a> | 0.7.1   | All    | All     | All      |
| Application | <a href="#">Activecollab</a> | <a href="#">Activecollab</a> | 0.7.1   | All    | All     | All      |
