

# CVE-2009-2598

[MITRE](#)[NVD](#)[CVE.ORG](#)[JSON API](#)[Print: PDF](#)

## Summary

|                        |                                                                                                                              |
|------------------------|------------------------------------------------------------------------------------------------------------------------------|
| <b>CVE</b>             | CVE-2009-2598                                                                                                                |
| <b>State</b>           | PUBLIC                                                                                                                       |
| <b>Assigner</b>        | cve@mitre.org                                                                                                                |
| <b>Source Priority</b> | CVE Program / NVD first with legacy fallback                                                                                 |
| <b>Published</b>       | 2009-07-27 14:30:00 UTC                                                                                                      |
| <b>Updated</b>         | 2018-10-10 19:40:00 UTC                                                                                                      |
| <b>Description</b>     | Multiple SQL injection vulnerabilities in Online Grades & Attendance 3.2.6 and earlier allow (1) remote attackers to execute |

## Risk And Classification

### Problem Types: CWE-89

## NVD Known Affected Configurations (CPE 2.3)

| Type        | Vendor                       | Product                       | Version | Update | Edition | Language |
|-------------|------------------------------|-------------------------------|---------|--------|---------|----------|
| Application | <a href="#">Onlinegrades</a> | <a href="#">Online Grades</a> | 3.2.6   | All    | All     | All      |
| Application | <a href="#">Onlinegrades</a> | <a href="#">Online Grades</a> | 3.2.6   | All    | All     | All      |

## References
