

# CVE-2009-3186

[MITRE](#)[NVD](#)[CVE.ORG](#)[JSON API](#)[Print: PDF](#)

## Summary

|                        |                                                                                                                                   |
|------------------------|-----------------------------------------------------------------------------------------------------------------------------------|
| <b>CVE</b>             | CVE-2009-3186                                                                                                                     |
| <b>State</b>           | PUBLIC                                                                                                                            |
| <b>Assigner</b>        | cve@mitre.org                                                                                                                     |
| <b>Source Priority</b> | CVE Program / NVD first with legacy fallback                                                                                      |
| <b>Published</b>       | 2009-09-15 21:30:00 UTC                                                                                                           |
| <b>Updated</b>         | 2009-09-16 04:00:00 UTC                                                                                                           |
| <b>Description</b>     | Multiple cross-site scripting (XSS) vulnerabilities in VideoGirls BiZ allow remote attackers to inject arbitrary web script or HT |

## Risk And Classification

### Problem Types: CWE-79

## NVD Known Affected Configurations (CPE 2.3)

| Type        | Vendor                     | Product                        | Version | Update | Edition | Language |
|-------------|----------------------------|--------------------------------|---------|--------|---------|----------|
| Application | <a href="#">Videogirls</a> | <a href="#">Videogirls Biz</a> | All     | All    | All     | All      |
| Application | <a href="#">Videogirls</a> | <a href="#">Videogirls Biz</a> | All     | All    | All     | All      |
